PERSONAL PROJECTS

Lienco Construction Website

- <https://github.com/ShaquilleNeil/Lienco4> (Repository)
- Live Demo : <https://shaquilleneil.github.io/Lienco4/>
- Simple interactive website created for LienCo Construction. Created with ReactJS and also integrates firebase database functionalities. It allows each customer to acquire an account to add and track their designated construction projects.

LinkedIn Clone(Mock up)

- https://github.com/ShaquilleNeil/LinkedIn_Clone_IOS.git
- A linkedIn clone created on xcode utilising the swift language. Mock up only, no functionalities or backend capabilities were added

Functional Clock

- <https://github.com/ShaquilleNeil/Functional-Clock>
- Live Demo : <https://shaquilleneil.github.io/Functional-Clock/>
- A simple clock that functions in real time via javascript, html and css

BrickBasket(in progress) (09/2025 - Present)

- A simple construction material delivery website designed to deliver construction materials on time and professionally
- <https://github.com/ShaquilleNeil/BrickBasket>

Calculator(IOS) (09/2025 - 09/2025)

- A fully functional calculator that performs all the necessary mathematical operations
- https://github.com/ShaquilleNeil/Ios_Calculator.git
